Dear Aleppo Sewer Customer –

Effective January 1, 2018, the Aleppo Commissioners and the Aleppo Township Authority have adopted new sewer rates to cover the following sewer expenses:

- Costs for the debt service from the Aleppo sewer upgrade project
- Operation and maintenance (O&M) costs for the Aleppo owned sewer system
- Aleppo's share of the debt service payable to Sewickley for the Interceptor that connects the Aleppo system to the Sewickley treatment plant
- Sewage treatment costs payable to Sewickley

The payments due to Sewickley are paid by Aleppo Township using the funds collected from the Aleppo sewer customers.

There is no change in the charge for the Aleppo debt service. The Aleppo Township Authority O&M rate increased to cover the Authority's increased operating and maintenance expenses. The payments to Sewickley will be based on water consumption data, and the Interceptor debt service will now be a fixed monthly amount rather than a fluctuating metered amount. The Sewickley treatment rate is increased to cover the Sewickley treatment plant's O&M budget.

The changes in the new rates are shown on the attached charts. Your new monthly bill shows a line item for the Aleppo debt service and a new line item for the Interceptor (Sewickley) debt service (previously paid through the per-gallon rate.) This amount will not vary from month to month. The combined amount for Aleppo and Sewickley O&M will be \$12.13 per thousand gallons based on your water consumption.

If you would like more information, a video presentation about the new rates is available on the main page of the Aleppo Township website located at www.aleppotownship.com.

Sincerely,

John Seifarth
Chairman, Aleppo Township Authority

Daniel Darragh
Aleppo Township Commissioner
